Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I claim(s) 1-12, drawn to photonic crystal slab device with 3D local structure.

Group II claim(s) 13-14, drawn to method of manufacturing a photonic device.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: There are no special technical features because in order to be a special technical feature, a *claimed* feature must define a contribution *over* the prior art. Furthermore, a refractive index member is not a special technical feature since refractive index members are known in the prior art as evidenced by Applicant's submitted prior art. Since the refractive index member is the only claim element that could be regarded as a candidate for a special technical feature in method claims 13-14, and the said refractive index member cannot in fact be regarded as a special technical feature for the reasons indicated above, the inventions

Art Unit: 2883

listed as Groups I-II do not relate to a single general inventive concept since they lack the same or corresponding special technical features.

Thus, it is acceptable under the PCT rules to restrict the claims in this case.
